

Aubrie Woodbine

SOFTWARE DEVELOPER

Chicago, IL | 860-970-1174 | AubrieWoodbine@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY Full-stack developer with strong frontend experience building data-driven applications, dashboards, and no-code tools using React, Next.js, D3.js, and REST APIs. Experienced in integrating backend services and developing user-focused systems in a startup environment.

SKILLS

Languages: JavaScript, Python, SQL
Frontend: React, Next.js, Redux, HTML, CSS, MUI
Data Visualization: D3.js, Charting Libraries
Backend: Node.js, Express.js, Flask, SQLAlchemy
Databases: PostgreSQL, MongoDB
Tools: Git, Docker, Postman, Jira, Railway

EXPERIENCE

ValStorm | Web Developer

July 2024 - Present

- Developed a no-code dashboard and workflow system enabling non-technical users to build and customize data-driven interfaces using React and MongoDB-backed APIs.
- Built interactive data visualization components (line, bar, pie, multi-level charts) using D3.js and React to display real-time data.
- Integrated frontend components with backend APIs, handling data transformation and ensuring consistent, reliable data flow across the application.
- Implemented dynamic UI features including drag-and-drop layout editing, component resizing, and real-time configuration updates.
- Built core product features including an API query builder, notes system (CRUD), and interactive activity feed with messaging and media playback.
- Collaborated directly with leadership in a small team environment, contributing to feature planning, product decisions, and rapid iteration.

StaffMark | Product Assembler

Oct 2021 - Oct 2023

- Maintained quality standards and resolved production issues in a fast-paced environment.

ClampuSystems | Office / Shop Assistant Manager

Feb 2011 - Aug 2021

- Managed scheduling, inventory tracking, and operational workflows to ensure projects were completed on time.
- Trained and onboarded new employees, improving team productivity and operational consistency.

PROJECTS

TaskFlow | React, Redux, Next.js, Express, PostgreSQL

[Live](#) | [GitHub](#)

- Developed an interactive calendar-based task management system with assigned and unassigned task workflows, task editing, completion tracking, and protected user-specific data
- Implemented secure authentication and session persistence using JWT, HTTP-only cookies, CSRF protection, and cross-origin production deployment handling
- Designed and integrated a structured daily reflections system, allowing users to track accomplishments, challenges, goals, and project progress over time

- Created reusable modal and layout systems with responsive UI patterns, consistent styling architecture, and accessible interaction flows
- Built RESTful API endpoints and integrated frontend state management with asynchronous Redux thunks and centralized session handling
- Configured and debugged production deployment infrastructure on Railway using PostgreSQL schemas, Sequelize migrations/seeding, environment variables, CORS, HTTPS proxy trust, and cross-domain cookie/session handling

PenCrafted | *React, Redux, Flask, PostgreSQL*

[Live](#) | [GitHub](#)

- Integrated TipTap rich text editor with custom extensions and tooltips to enhance editing functionality.
- Developed RESTful APIs using Flask to manage user-generated content and application state.
- Implemented secure authentication with encrypted password storage and protected API routes.
- Designed and managed a PostgreSQL database using SQLAlchemy for efficient data handling.

EDUCATION

App Academy - Full Stack Web Development

Graduated June 2024

- Completed an intensive full-stack program focused on JavaScript, Python, React, Redux, Flask, and Express.
- Built and deployed full-stack applications using PostgreSQL and RESTful APIs.
- Implemented authentication, authorization, and security best practices.
